PROJECT

Smart Attendance Management System – College Project

- **Technologies:** PHP, MySQL, HTML, CSS, JavaScript, Cloud (PostgreSQL)
- **Developed an automated attendance system:** Designed a web-based solution that streamlines the attendance-taking process for teachers, automating the collection of student attendance records
- **Database Integration:** Utilized MySQL and PostgreSQL for efficient storage of attendance data, ensuring data consistency and smooth retrieval of student records.
- **User Authentication:** Implemented secure login functionality for teachers and administrators with role-based access.
- **Front-end Development:** Used HTML, CSS, and JavaScript to build responsive UI, improving user experience and interactivity.
- **Attendance Data Visualization:** Created dynamic reports and visual representations of attendance data, enabling quick review of student attendance patterns.
- **Implementation of Date-based Filtering:** Added the feature to filter attendance records based on specific dates, providing ease in record tracking.
- **Cloud Integration (Optional):** Could be expanded for cloud-based hosting and operations, ensuring that the system is scalable and reliable.

I hear by declare that the above information is true to the best Knowledge and belief.

Place: Mumbai **Signature**
